How To Adjust Who Sees Your
Facebook Posts

Hello NCKCN internet members

July is a delicious time of year and we hope you're getting a taste of all it has to offer. Of course, the Internet is a little like a slice of watermelon – you have to deal with a few seeds while enjoying the good stuff. Speaking of which, be sure to check out our **alert about the GameOver Zeus malware**, including warning signs and a helpful resource. Another "seedy" online threat is the **Remote Access Trojan**, which is covered in This Month's FAQ. To enhance your privacy, we share quick-and-easy instructions on **how to adjust who sees your Facebook posts**.

Also on the menu of this July issue are **recipes featuring summer produce** and a video showing an **unusual apple-peeling method**. Since so much of summer is spent outside, don't miss the **tips for protecting your skin** against the sun, the inspiration of an **amazing mountain climb** without ropes, and a cool idea for a **skateboard swing**.

The goal of each of our eNewsletters is to keep our subscribers informed regarding their Internet connection and to improve their Internet experience. We think you'll find this information interesting.

To see what's inside this issue, simply scroll down the eNewsletter or click on the links within the index to the left. Thanks for reading!

Malware Alert - Cyber Pandemic Known As GameOver Zeus

On June 2, 2014, the Department of Justice and the FBI announced a multinational effort to disrupt the dangerous cyber pandemic known as GameOver Zeus. The malware, which the FBI estimates has hit between 500,000 and one million computers worldwide, is believed to be responsible for the theft of millions of dollars from businesses and consumers. **[CLICK HERE FOR ALL THE DETAILS.](#)**

Respect Copyrighted Material And Avoid Digital Piracy

With so many options out there for viewing movies and TV shows online, it can be confusing to find the real thing — content that doesn't involve copyright infringement. In addition, others could be using your Internet account without your knowledge to conduct illegal activities. It's important you understand that downloading pirated content through a site like BitTorrent is illegal and organizations are actively protecting these rights.

For example, the Copyright Alert System (CAS) is designed to help consumers understand when files may have been shared illegally on peer-2-peer (P2P) networks through their Internet accounts. According to www.copyrightinfringement.org, "artists, moviemakers and other owners of content join public P2P networks to see if the music, movies, and TV shows they've made available are being shared without permission and in violation of U.S. copyright law. If they notice that a file is being shared illegally, they notify the appropriate Internet Service Provider (ISP) and that ISP, in turn, passes on that notice to their subscriber as a Copyright Alert."

NCKCN is receiving CAS notifications regarding copyright infringement by our Internet customers. Sharing illegal content violates the NCKCN/Cunningham Acceptable Use Policy. Disciplinary action including fees associated with tracking and notifying customers of violations up to, and including, termination of the Internet account for repeat violators may be taken.

If you are alerted about unlawful content sharing, we trust that you will take the appropriate steps to correct the situation. To help avoid these issues in the future, follow these tips:

- Watch for titles that are "too new to be true." Movies that have yet to be released in theaters, or which are still out in theaters, are not legally available online. If very recent titles are being sold or traded online, they are almost invariably illegal copies.
- Trust your eyes and ears. In many cases, the quality of illegal copies is inferior with poor sound and can appear blurry or shaky.
- Be cautious when websites make offers that are "too good to be true." Be wary of "free" content when searching for and purchasing downloads from unfamiliar sites; they typically indicate pirated product. Look out for terms like "Unlimited Movie Downloads," "100% legal," and "Millions of Files Shared." Offers for one-time or yearly fees with no details and no contact information should also alert you that you have entered an illegal site.

As you look for entertainment online, remember to be respectful of the artists' work and keep your downloading within legal parameters. If you have any questions about our policies regarding digital piracy, call NCKCN at 785-738-2218.

This Month's FAQ - What Does The Acronym RAT Mean?

Question: I've seen the acronym RAT used in computer articles but am confused by its meaning. Does it stand for Remote Access Tool or Remote Access Trojan?

Answer: Actually, RAT can stand for either Remote Access Tool or Remote Access Trojan. What's the difference? A Remote Access Tool is a piece of software used to remotely access or control a computer; it can be used legitimately by system administrators for accessing client computers. For example, the IT person at your company could use a Remote Access Tool to see what's on your computer screen and help you troubleshoot a problem.

When a Remote Access Tool is used for malicious purposes by hackers, it's known as a Remote Access Trojan. This type of RAT (aptly named) infects the victim's machine to gain administrative access and allows hackers to perform unauthorized operations. To prevent unknowingly allowing a Remote Access Trojan to invade your computer, avoid unsolicited email attachments and links, run up-to-date security software, and don't believe anyone who contacts you claiming to be tech support for a major company.

Short Tutorial - How To Adjust Who Sees Your Facebook Posts

If you have a large number of Facebook friends, it's likely this list includes people who are actually distant acquaintances. Should you decide you don't want these people seeing all of your Facebook posts, simply follow the steps below to adjust your default audience.

Locate Privacy Settings

1. On your Facebook home page, click the **down arrow** on the top-right part of the screen.
2. From the menu, choose **Settings**.
3. You will be brought to a page titled **General Account Settings**.
4. In the left column, click **Privacy**.
5. You will be brought to a page titled **Privacy Settings and Tools**.

Adjust "Who Can See My Stuff"

1. On the Privacy Settings and Tools page, under "Who Can See My Stuff," next to "Who can see your future posts," click **Edit**.
2. You will see an image that looks like the status update box. Click the **down arrow** at the bottom of this image.
3. **Select** who you want to be the default audience for your posts (remember, you can change this each time you post). Then click **Close**.
4. Click the **other links** in this section and follow the instructions to adjust past posts.
